

Stand-Ups

- 1.) What was achieved last week?
 - Implemented status codes.
- 2.) What is the focus for today?
 - Make everything from scratch, an AI-free project.
- 3.) What blockers exist?
 - Lack of knowledge with making validations.

Retrospective

- 1.) What went well? (Wins/Successes)
 - I am motivated to use AI as a tool only.
- 2.) What didn't go well? (Problems/Challenges)
 - Although I am trying to understand the code an AI gives, there are parts I cannot understand.
 - I need to study validations.
- 3.) What should we start doing? (Improvements)
 - Do research while coding and use AI as a tool only.
- 4.) What should we stop doing? (Waste/Inefficiencies)
 - Being dependent, especially me as a Backend Developer. I need to be independent.
- 5.) What should we continue doing? (Best Practices)
 - Make our project AI free
 - Be an independent developer
