

Stand-Ups

- 1.) What was achieved last week?
 - Implemented status codes for some of the modules.
- 2.) What is the focus for today?
 - Continue to implement status code for all of the modules.
 - Implement a clean swagger UI, where only Get, Post, Put, Delete can be seen in each module.
- 3.) What blockers exist?
 - Lack of knowledge in making a cleaner swagger UI.

Retrospective

- 1.) What went well? (Wins/Successes)
 - Properly implemented status codes for some of the modules.
- 2.) What didn't go well? (Problems/Challenges)
 - There are modules I have a problem with implementing status codes.
- 3.) What should we start doing? (Improvements)
 - Connecting frontend and backend.
 - Have a clean project.
- 4.) What should we stop doing? (Waste/Inefficiencies)
 - Making the project very confusing.
- 5.) What should we continue doing? (Best Practices)
 - Keep DTOs clear and controllers organized.
 - Always test endpoints after changing anything important.
