

PROGRESS REPORT

STAND-UPS:

1. What was achieved last week?
 - Last week, I discontinued the previous project and began a new one.
2. What is the focus for today?
 - My focus for today is to start working on css first.
 -
3. What blockers exist?
 - One blocker is my limited knowledge of coding, especially when implementing certain front-end elements.
 - I redid everything and started learning again on my own this time.

RETROSPECTIVE:

1. What went well? (Wins/Successes)
 - Better files
 - Not complicated features
 - Maintained a clear and organized layout across all interfaces.
2. What didn't go well? (Problems/Challenges)
 - Do not yet fully understand everything about coding, especially when implementing certain front-end elements.
3. What should we start doing? (Improvements)
 - Begin collecting early feedback to improve interface usability.
 - Continue researching, practicing, and improving while building the interface.
4. What should we stop doing? (Waste/Inefficiencies)
 - Avoid adding unnecessary features that do not contribute well to the final system.
 - Avoid procrastination and manage time more effectively.
5. What should we continue doing? (Best practices)
 - Maintaining a clear and organized interface layout.
 - Continuously learning and practicing front-end development.
 - Follow clean and organized coding practices.
 - Test code regularly to identify and fix errors early.
 - Keep researching solutions and coding techniques when encountering problems.
